Response to Amendment

The reply filed on 5 June 2006 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): the new claims contain subject matter requiring an election of species. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Group I.

Magnetic latch (Figure 3)

Spring loaded retainer (Figure 10A)

Compression ring (Figure 9A)

Flexible locking clamp (Figure 8A)

The species are independent or distinct because the latching mechanisms are structurally and mechanically different from one another.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 23, 29, 30, 31, and 49 are generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of a species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Response to Arguments

Applicant's arguments filed 5 June 2006 have been fully considered but they are not persuasive. The new claims are considered to be restrictable with respect to species. In response to this Office action, the examiner strongly encourages applicant to elect one group and prosecute the elected claims. Canceling claims 23-50 and submitting another new set of claims will be held deliberately non-responsive.

In order to advance prosecution, the examiner considers U.S. Pat. Nos. 6,935,427 (Billingsley) and 6,883,612 (Ferguson et al.) to be pertinent.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Smith whose telephone number is 571-272-7034. The examiner can normally be reached on T-F, 9-4.
